

Autumn 2024

Marsh Medical Practice

PATIENT NEWSLETTER

Stay healthy this winter

If you have a long term health condition, please make sure you attend your regular reviews when reminded to do so.

If you are worried you have missed a review or want to check when it is due, please contact our reception team.

Vaccinations

Are you eligible for a flu, pneumonia, shingles or Covid vaccination? We strongly advise you take up any invites you may receive for these vaccinations.

Texts will be sent to eligible patients so please make sure your mobile details are up to date with Reception.

Dispensing Machine.

It's great to see so many of you using the 24 hour dispensing machine to collect your medications.

If you would like to use this facility, please speak to our Dispensary Team – not all medications can be dispensed in this way but most can!

Please let us know...

if you are not going to be attending your appointment. Wasted appointments mean other patients have to wait longer to be seen! Thank you.

Know your ABC

Atrial fibrillation
Blood pressure
Cholesterol

Heart rhythm problems, high blood pressure and high cholesterol affect many of us, sometimes without any symptoms.

Early detection is easy and can make all the difference to your long term health.

Book a health check today or see our website for more details.

PPG

Thank you to all of you who expressed an interest in joining the Patient Participation Group (PPG). Our patients are the centre of all we do and the feedback that we receive via the PPG is invaluable.

NHS App

If you have not yet downloaded the NHS app, you can do so via www.nhsapp.service.nhs.uk

Once you have the app you can order repeat medication, book and manage appointments, view your health records and much more.
